## **RLH INDUSTRIES REVAMPS NASCAR WITH FIBER OPTICS**

RLH Industries was selected the preferred vendor by NEXTEL Communications to provide fiber optic communication capability to the California, Las Vegas, and Phoenix speedways. Right now, each of these locations is equipped with RLH's fiber optic hardware and cabling.

RLH's Fiber Optic Link equipment provides increased capacity and reliability for the thousands of cell phone users attending races at these locations. Because fiber optic cable is impervious to heat and induced interference it was the perfect solution to providing communications at the track where summer temperatures can exceed 130 degrees. RLH Industries enjoys its association with NEXTEL, providing fiber optic communications links to many NEXTEL PCS sites across the U.S.

In an interview at the track, Patrick Hawkins, VP of RLH Industries stated, "fiber optics is a perfect fit for this application. We have provided Fiber Optic Links for three NASCAR speedways so far and we are planning to provide additional Fiber Optic Links to more NASCAR speedways in the future."

NEXTEL, after signing a ten-year sponsorship deal with NASCAR prior to the 2004 season has become the main sponsor for one of the biggest race series in all of motor sports. This being the NASCAR NEXTEL Series Cup, which gathers the worlds top NASCAR drivers to compete for the ultimate trophy in racing.
