

**RLH P/N 8806-1284-01
ALL-DIELECTRIC (NON-METALLIC HOUSING)**

Frame mounting specifications for the RLH/ HOFFMAN All-Dielectric 30" x 23" x 13" Weatherproof Cabinet.

Separation of overall Supporting Poles depends upon equipment growth needs if any.

Supporting Poles should be a minimum 2" diameter and maximum 4" diameter galvanized supporting pipe.

Set Supporting Poles a minimum of 2-4 feet into ground and secure into a concrete footing.

Cap all top or exposed supporting pipes with standard galvanized pole cap for moisture and safety.

Galvanized slotted Unistrut material should be bolted through supporting poles or U-bolted around Supporting Poles by galvanized or stainless steel mounting hardware.

Slotted Unistrut material should accommodate up to 1/2 diameter mounting bolts if required.

Plywood Backboard Specifications: 3/4" X 21" W X 27" L
