# RLH TELCO INTERFACE UNITS

## CABINETS - PEDESTALS

RLH Telco Interface Units are pre-wired cabinets and pedestals that allow for faster and more uniform field installations. They are comprised of standard RLH enclosures including aluminum, galvanized steel, stainless steel, and fiberglass reinforced cabinets. They are also offered in Type 02, 03, 06, 07 and high density steel pedestal configurations. This wide range of enclosure availability can accommodate almost any installation requirement.

They are equipped with RLH card housings and terminals, pre-wired and ready for installation. Adding RLH Fiber Optic Link cards is fast and easy. Simply make your connections at the terminal, insert RLH cards into the housing guides, and attach your copper and fiber connections. Models are also available with gas tube protection.

Refer to the cabinet or pedestal product information sheets for details on each enclosure style. Custom configurations are available through our factory modification program.

### Standard Features

Utilizes standard RLH enclosures including:

- Aluminum Cabinets
- Galvanized Steel Cabinets
- Stainless Steel Cabinets
- Mini Fiberglass Reinforced Cabinets
- Standard Fiberglass Reinforced Cabinets
- Type 02/03 Pedestals
- Type 06/07 Pedestals
- High Density Steel Pedestals

Wide selection of RLH card housings

Terminations pre-wired for fast connections

Gas tube protection available

Can accommodate wide variety of RLH Fiber Optic Link cards

Add customer required telco equipment as needed

Fire treated and painted 3/4" plywood backboard

Exclusive lifetime warranty

Specifications subject to change without notice.

**H24" x W24" x D16" Metal Telco Units**
