# PRODUCT SPECIFICATIONS

RLH aluminum, galvanized and stainless steel enclosures provide long-lasting protection for electrical components, and may be used in both indoor and extreme outdoor environments.

Both the aluminum and galvanized enclosures are powder coated light gray and highly resistant to corrosion. Stainless steel models come in a natural stainless steel finish.

Aluminum enclosures set the standard for light weight and durability, and galvanized steel enclosures are a cost effective solution. Stainless steel provides the ultimate in durability and protection.

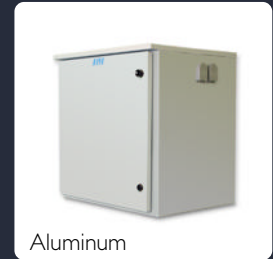

### STANDARD FEATURES:

- Top and bottom vented, NEMA 4X compliant, weatherproof design
- Precision welded, heavy duty construction
- Fire treated and painted 3/4" plywood backboard and bottom base board
- Hinged door with Limit Stop
- Neoprene weather tight door seal
