

RLH Industries, Inc. Mini Fan Kit

Description

The RLH Mini Fan is a plastic NEMA 4X vent kit with fan and thermostat. The Mini Fan Kit can be installed into RLH enclosures without any additional drilling or modifications. The small DC fan is power by 12 or 24 VDC and requires a maximum of 100mA. The thermostat has a normally open contact that closes with temperature rise and can be adjusted between 30-140°F. The thermostat is din rail mounted. For AC powering applications an optional AC/DC power supply is required.

Features / Benefits

- Compatible with all RLH enclosures
- Provides regulated cooling of equipment
- Maintains cabinet NEMA 4X rating

Specifications:

Operating Voltage: 10-27 VDC
Maximum Current: 100mA
Dimensions: Fan Assembly: H2.5"xW1.875"xD1.75"
Thermostat: H2.75"xW1.5"xD1.5"
