

2025 FIELD SERVICES

The leader in
fiber optic services
since 1988

Fiber Cable Installation
Structured Cabling
High-Voltage Protection
Turn-Key Installations
Telco Coordination & Design

Fiber Optic Cable Termination, Testing, and Repair

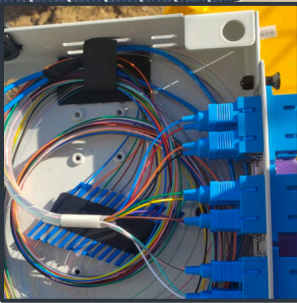

RLH has 30+ years of experience working on fiber cable within power utilities, renewable energy facilities, and commercial properties. With a team of professionals, and an outstanding field-safety record, we are ready for any fiber-services project.

Fiber termination, splicing, testing, and maintenance are important services needed at every fiber location. Critical communication lines require trained and certified technicians for fast and reliable service. RLH can provide fiber services in any environment as well as offer solutions to improve existing infrastructure. Our installation team will work with you each step of the way to ensure a trouble-free process so that services are completed on time.

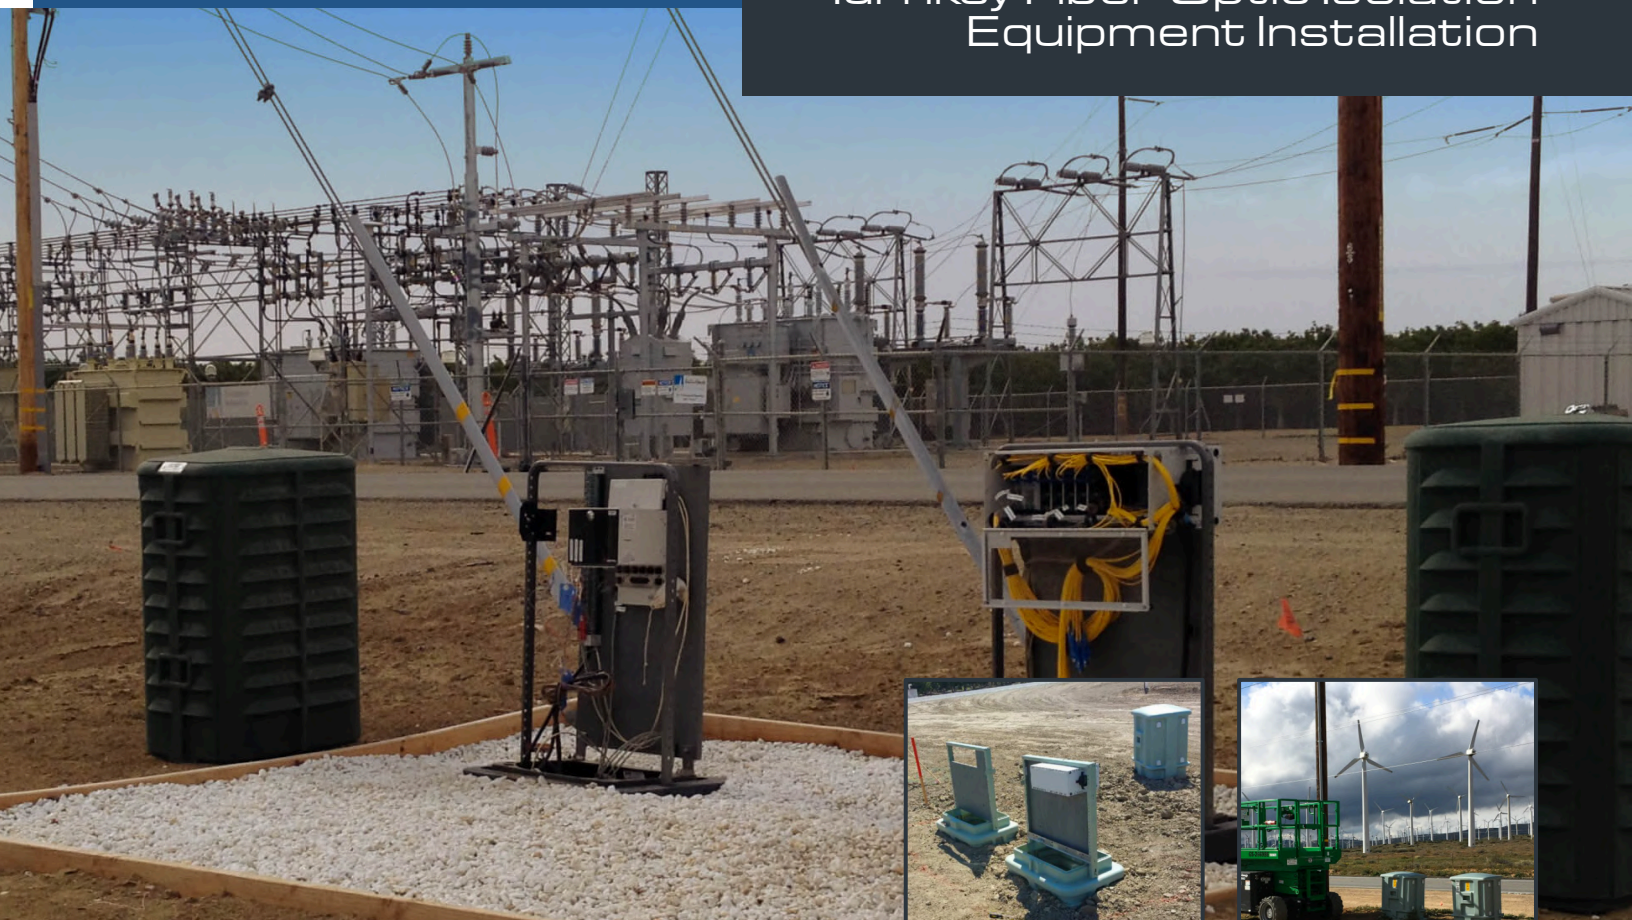

Telecommunication Coordination & Design

RLH has 30+ years of experience working with service providers on delivering telecommunication services into high voltage facilities and/or remote locations. Our team provides a turn-key service, from identifying the local internet service provider to evaluating the closest point of interconnect and evaluating special construction costs. RLH can also analyze the most cost-effective solution between fiber all the way, traditional leased line, microwave, and cell or satellite wireless service.

Additionally, we work with the local service provider on establishing the location and requirements of the demarcation point, and also offer contracting services to assist with the build-out of the demarcation when necessary.

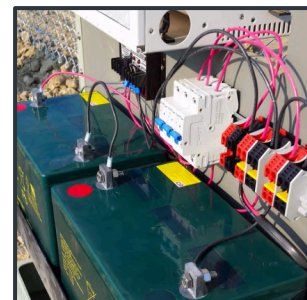

Turnkey Fiber Optic Isolation Equipment Installation

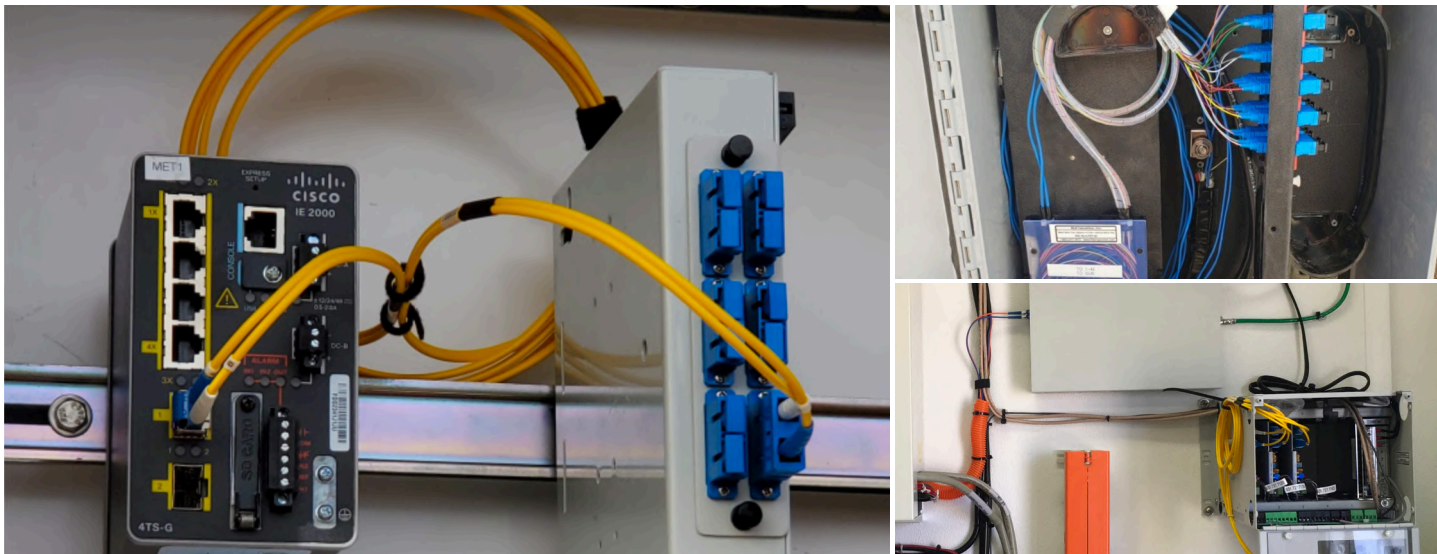

RLH is a pioneer in installing fiber optic isolation equipment and providing a safety solution to high voltage facilities requiring lease line service. We have been helping customers navigate the complex world of ISP isolation requirements for over 30 years.

We offer the most experience and the best product, in addition to a world-class team of project managers. Our installation team will work with you each step of the way to ensure a trouble-free process so that services are delivered on time. With a single point of contact, we make complex fiber optic communications simple.

RLH's team of expert technicians will handle the installation of your isolation equipment. We do everything from pedestal installation to the most complex fiber cable installation and termination projects.

Fiber Services by Industry

- Renewable Energy:
Solar, Wind, BIO
- Power Generation/Distribution:
SCADA Networks, AMR Networks
- Utilities:
Water, Waste, Electric, Gas, Transportation
- Service Providers:
Cellular, Backbone
- Local & State Government:
Infrastructure
- Security:
Video Surveillance
