

Single Fiber Link Card Housing

8806-1200-07

DIN-Rail & Wall Mount Applications

The Single Fiber Link Card Housing is designed to securely mount one Fiber Link Card. The housing is powder coated steel for strength and durability, and features a latching, slide out rail for easy access to the card from the front of the housing.

The Fiber Link card may be partially extended from the housing for access to the copper and connectors, and then fully inserted into the housing for protection.

This DIN mount housing is perfect for compact DIN rail applications, or crowded equipment areas where space is at a premium. The housing provides protection for the card, which helps to ensure reliability of the equipment.

Single Fiber Link Card Housing
